Dear Dave,

10/22/76

Glad to get the attractive flyers and the AIB listings.

Just got new material for Photo WW reprint to printer. Book back in about month.

Typically the AIB can't be correct ~~me~~ when it is easy. They have my wrong address, which means those letters they might have inspired will be returned; and they do not have the last book; and they fail to mention Jim re WW IV.

With your program I'll try to find time to prepare an outline for each thing. These do not fit those kinds of appearances I have made in the past.

If you get any of the AIB tapes, and I recommend them for the Dracula-Frankenstein crowd only, I'd be interested in hearing what Lane, Gregory, et al have to say. I note, naturally, that McMillan has prohibited use of the tapes of him. They don't say this but what else makes them alone unavailable?

I've been looking ahead. I have new file cabinets and have begun to establish separate files for the materials available beginning in 1970. These are most FBI. I have them. I'm getting the 1975 releases.

I haveall the CIA releases and they take up most of a cabinet already.

I've not had time to read much of this. I'm using a few bits in the addition to PW though. Intersting stuff.

Best to all,
